1 Getting started

Attendance replaces the paper register. A teacher marks a class in a few taps. A student sees exactly where they stand. The head of department (HOD) sees every section, and every change is written to an audit trail.

Who uses it

Role	What they do
Student	Checks their attendance, applies for leave with a certificate, joins events that count as attendance.
Teacher	Marks the register for their own classes, corrects mistakes within 48 hours, cancels a class they cannot take, decides leave for the section they are class teacher of.
HOD	Builds courses, sections, subjects and timetables, adds students, cancels classes for holidays and events, reads every record.
Mentor	Runs clubs and posts events that can credit class attendance.
Administrator	Creates the HOD, teacher and mentor accounts and resets passwords. Does not teach.

Opening the app

Scan the QR code on the notice board, a slide or the stall with your phone camera. It opens the introduction page, which anyone can read before they have an account. From there, tap **Sign in**.

ATTENDANCE

The college attendance register, on every phone.

Teachers mark a class in seconds. Students see exactly where they stand. The head of department sees everything, with an audit trail behind every change.

[Sign in](#)[Download the user manual \(PDF\)](#)[Read the manual online](#)

Try it with a demo account

No sign-up. Each button opens a sample college as that person. To type it in instead, the password for every demo account is `demo1234`.

HOD

Dr. Kavitha Rao `demo.hod`
Builds the timetable, cancels classes, decides leave.

Teacher

SS `demo.teacher`
Marks today's register in a few taps.

Student

Ananya Das `demo.student`
Above 90%, so the attendance badge is on show.

Student at risk

Rohit Nair `demo.atrisk`
Below the minimum; sees how many classes it takes to recover.

Mentor

Vikram Singh `demo.mentor`
Runs a club and adds event attendance.

Administrator

Demo Administrator `demo.admin`
Creates accounts and oversees the college.

What it does

The introduction page: what the app is, a sign-in button, this manual, and the demo accounts when they are switched on.

Keep it on your home screen

On Android, open the site in Chrome, tap the  menu, then **Add to Home screen**. On an iPhone, open it in Safari, tap Share, then **Add to Home Screen**. It then opens like an app.

Signing in

1. Your department creates your account and gives you a **login ID** and a first password in person. Nothing is emailed.
2. Type the login ID and password, and tap **Sign in**.
3. Open **Profile** and change the password. Whoever created your account knows the first one.

Attendance

Sign in with the login ID your department gave you.
Forgotten it? Your class teacher or the HOD can set a new password.

Login ID

Password

Sign in

Or try a demo account

No sign-up. Each button opens a sample college as that person. To type it in instead, the password for every demo account is `demo1234`.

HOD
Dr. Kavitha Rao `demo.hod`
Builds the timetable, cancels classes, decides leave.

Teacher
SS `demo.teacher`
Marks today's register in a few taps.

Student
Ananya Das `demo.student`
Above 90%, so the attendance badge is on show.

Student at risk
Rohit Nair `demo.atrisk`
Below the minimum; sees how many classes it takes to recover.

Mentor
Vikram Singh `demo.mentor`
Runs a club and adds event attendance.

Administrator
Demo Administrator `demo.admin`
Creates accounts and oversees the college.

[New here? What this app is](#) · [User manual \(PDF\)](#)

The sign-in page. The demo accounts underneath appear only on a demonstration deployment.

The left rail (the bottom bar on a phone) lists only what your role can use. **Guide** repeats the steps for your role inside the app, and has a button to download this manual.

Attendance — User manual

4 / 30

2 How attendance is counted

Your percentage is measured against the classes your section actually **held**. A class counts as held once its teacher takes the register.

$$\text{Attendance \%} = \text{present} \div (\text{present} + \text{absent} + \text{not marked})$$

Situation	How it counts
Present	Counts for you.
Absent	Counts against you.
Not marked	The class was held but the register has no mark for you. It counts as missed; if you were there, ask your teacher to correct it.
Approved leave	Left out completely, so approved leave never lowers your percentage.
Cancelled class	Never held, so it counts for nobody and nothing can be marked.
Event credit	A period credited by an event you took part in counts as present.
Before you joined	Classes held before your account existed do not count against you.

Example. Your section held 91 classes. You were present at 88 and absent from 3: $88 \div 91 = 96.7\%$.

The minimum, and how to reach it

Each course has a minimum percentage set by the HOD; 75% if none was set. When you are below it, the app tells you how many classes you must attend *in a row* to reach it. It never tells you how many you can afford to skip.

The 90% badge

★ 90%+ attendance

Reach 90% overall and a gold badge appears on your overview and your profile, and a star appears next to your name in the register your teachers read. Below 90%, the app tells you how many classes in a row it takes to earn it.

3 For students

Your overview

The first page after signing in. The ring is your percentage against the minimum for your course. Below it: how many classes it takes to reach the minimum, the badge, today's classes (cancelled ones are struck through with the reason) and any classes cancelled in the days ahead.

Good day, Ananya Monday, September 28

★ 90%+ attendance

Badge earned. Keep it up.

You have attended 96.7% of the classes held for you. That puts you in the 90% club: the badge shows on your profile, and your teachers see it on the register.

Your attendance

96.7%

of 75% needed

88 present of 91 counted classes. D2 has held 91 classes so far.

You are above the minimum. Keep it there.

Your attendance

Minimum for your course is 75%.

Overall

96.7%

★ 90%+ attendance

91 classes held for you · 88 present · 3 absent · 0 approved leave

Your section has held 91 classes in total; 5 more were cancelled and do not count. Your percentage is measured against the classes that were held.

By subject

Business Communication (10/10)100.0%

Business Ethics (18/19)94.7%

Constitutional Values (5/5)100.0%

Environmental Studies – 1 (3/4)75.0%

Financial Institution and Market (14/15)93.3%

IT in Business (19/19)100.0%

Principles of Management and Organizational Behavior (19/19)100.0%

Subject detail

Subject	Held	Present	Absent	Not marked	Leave	%	Classes needed
Business Communication	10	10	0	0	0	100.0%	—
Business Ethics	19	18	1	0	0	94.7%	—
Constitutional Values	5	5	0	0	0	100.0%	—
Environmental Studies – 1	4	3	1	0	0	75.0%	—
Financial Institution and Market	15	14	1	0	0	93.3%	—
IT in Business	19	19	0	0	0	100.0%	—
Principles of Management and Organizational Behavior	19	19	0	0	0	100.0%	—
Review Business Communication	0	0	0	0	0	—	—

“Not marked” is a class your section held where the register has no mark for you. It counts as missed; if you were there, ask your teacher to correct it.

Attendance from events

Event	Date	Period	Class	Status
Inter-college B-Plan Contest	Thu, Sep 17	3	Financial Institution and Market	present, credited
Inter-college B-Plan Contest	Thu, Sep 17	4	Business Communication	present, credited

Per subject, and the classes credited by the B-Plan contest.

Your timetable

Schedule shows your section's week, with period times, the break and the after-hours activities, exactly as on the printed routine.

The D2 BBA routine: Monday to Friday, four periods, a break after the third.

Applying for leave

1. Open **Leave desk**.
2. Pick the **From** and **To** dates and write the reason.
3. Attach the medical certificate with **Take a photo** or **Choose a file** (JPG, PNG, WEBP, HEIC or PDF, under 2 MB).
4. Tap **Send request**. Your class teacher and the HOD are told.

Once approved, every class in those days is marked as leave, and leave does not count against you.

Your requests

No requests yet.

Only your class teacher and the HOD can open the certificate, and every view is recorded.

Events that count as attendance

An event can *credit* class periods: if you take part, you are marked present in whatever class your section has in those periods. Tap **Ask to join**. When the organiser approves you, or adds your attendance directly, the event card shows exactly what it did.

Inter-college B-Plan Contest

Thu, Sep 17

Entrepreneurship Cell members only

credits period 3, 4

The E-Cell team pitches its business plan at the regional round. Periods 3 and 4 are credited for the team.

Posted by Vikram Singh

your request: approved

✓ Attendance credited: period 3 · Financial Institution and Market

✓ Attendance credited: period 4 · Business Communication

Each credited period is named with its class. A period that could not be credited says why: no class then, a cancelled class, or a Sunday.

On a phone, the menu moves to a bar at the bottom of the screen.

4 For teachers

Your day

Your overview lists today's classes with their times. A class you cannot take can be cancelled right there with one tap on **cancel**, and undone the same way. Your students and the HOD are told.

Today's classes, the one-tap cancel, and leave requests waiting for a decision.

Marking the register

1. Open **Attendance**.

2. Pick the **Course**, **Section**, **Date** and **Period**. The roster loads from the timetable, so you can only open your own classes.
3. Tap **Mark all present**, then tap **A** for each absentee. **L** is leave.
4. Check the tally at the bottom, and tap **Save attendance**.

28 present · 2 absent · 0 leave

Save attendance

28 present and 2 absent, ready to save. Students on approved leave arrive already marked L.

Mark everyone before saving

A student left unmarked in a class you saved counts as having missed it. The tally warns you when someone is still unmarked.

A row tinted purple was credited through an event, and says so; saving the register again keeps it credited.

Correcting a mark

Tap **Correct** on the student's row, choose the new status, give a short reason, and tap **Save correction**. You can correct your own marks for 48 hours. After that, the HOD makes the correction, and it is recorded against their name.

Cancelling a class

From your overview, tap **cancel** next to the class. Or, on the marking screen, open the class and tap **Not taking this class? Cancel it instead**, add a reason if you like, and tap **Cancel this class**. A cancelled

class cannot be marked and counts for nobody. **Restore this class** undoes it. You can only cancel your own classes, and never one whose register you already took.

Leave for your section

If you are a class teacher, requests from your section arrive on the **Leave desk**. Open the certificate with **View medical certificate**, add a note if you like, and tap **Approve** or **Reject**. Approving marks leave across every class of those days. **Change this decision** reverses it later, with a reason.

Records and exports

Records shows attendance by student, with anyone under the minimum flagged in red. **Export all** and **Export under minimum** download a CSV that opens in Excel. On a phone, they open the share sheet, so the file can go straight to WhatsApp or email.

5 For the head of department

Setting up the department

Nobody can mark a register until the timetable exists, and each step depends on the one before it. Your overview shows a checklist until the department is set up.

#	Where	What
1	Setup	Add the course (for example BBA).
2	Setup	Add its sections (D1, D2...) and subjects.
3	Setup	Create teacher accounts, or ask the administrator to.
4	Setup → Allocation	Give each section a class teacher. Leave requests go to them.
5	Schedule	Set the week, then fill each section's timetable (see below).
6	Setup	Set the minimum attendance percentage for the course.
7	Setup → Accounts	Add students one at a time, or paste a CSV with Bulk import : <code>roll_number,name,login_id,password</code> , one per line.

Review Business Communication	1	To be assigned

Changing Wednesday's first period. The form opens under the grid, and the period being edited is outlined.

The builder keeps the timetable consistent

- A teacher cannot be in two sections at the same time. The teacher list says who is already teaching another section in that period.
- The week cannot be shortened while a class still sits in a day or period that would disappear. Clear it first.
- Clearing a period does not touch registers already taken in it.

Loading a printed routine in one go

A whole routine can be loaded from a file instead of being typed period by period. The D2 BBA routine ships with the app as `server/src/infra/db/timetables/d2-bba.json`, and whoever runs the deployment can load it:

```
DATABASE_URL="" npm run timetable:import -- server/src/infra/db/timetables/d2-bba.json --dry-run
DATABASE_URL="" npm run timetable:import -- server/src/infra/db/timetables/d2-bba.json
```

It creates the course, section and subjects if needed, sets the week and timings, and makes the section's timetable match the file. A teacher it does not know yet gets an account with a one-time password, printed once, to hand over in person. Before importing into a real college's database, put each teacher's full name, and a `loginId` if you like, in the file. A class the routine lists without a teacher, such as Wednesday's review session, is left for you to allocate from Schedule.

Cancelling classes in one tap

For a holiday, a strike, exam day or a fest: open **Schedule**, tap **Cancel classes**, pick the date and tap the red button. That cancels every class in the college for the day. You can narrow it to one course or one section, pick periods, and give a reason, which students see.

Cancel classes A holiday, a strike, a fest: one tap, and nothing is marked or counted.

Date

Which classes

Reason (students see this)

09/28/2026 

Every class in the college ▼

College closed for heavy rain

Periods (leave all unselected for the whole day)

1

2

3

4

Cancel classes on Mon, Sep 28

One tap cancels the day. **Undo** appears straight away, and **restore** stays available in the list of cancelled classes.

When classes are cancelled:

- students of the section and the teachers of those classes are notified;
- the classes cannot be marked, and count towards nobody's attendance;
- approved leave and event credits skip them;
- a class whose register was already taken is left alone and reported: it happened.

For a college-wide event, open it under **Events** and tap **Cancel ... for this event**: its credit periods, or the whole day, are cancelled in one tap, with the event named as the reason.

30 students

5 under the minimum ★ 10 with the attendance badge

Classes held: D2 91. Percentages count a held class with no mark as missed.

Roll	Name	Login ID	Section	Held	Present	Absent	Not marked	Leave	Attendance
D2-01	Ananya Das ★	demo.student	D2	91	88	3	0	0	96.7%
D2-02	Rohit Nair	demo.atrisk	D2	91	60	31	0	0	65.9%
D2-03	Aditya Kulkarni ★	demo.s03	D2	91	86	5	0	0	94.5%
D2-04	Meghna Reddy	demo.s04	D2	91	76	15	0	0	83.5%
D2-05	Farhan Qureshi ★	demo.s05	D2	91	85	6	0	0	93.4%

Five students under the minimum are flagged in red; ten hold the badge.

Leave, analytics and the audit trail

The **Leave desk** works as for a class teacher, for every section. **Analytics** shows each section's average against the classes it held, and how many were cancelled. **Activities** is the full audit trail: every mark, correction, cancellation, approval, credit and export, with who did it and why.

A pending request, with the certificate one tap away.

6 For mentors

Clubs

Under **Clubs**, create your club and add members by their login ID.

Events

1. Under **Events**, fill in **Post an event**: title, date, and who can see it: all students, or your club's members only.
2. If the event replaces classes, tap the periods it counts for under **Periods this event counts for**.
3. Tap **Post event**.

Giving students their attendance

Students ask to join; tap **Review join requests** and **Approve**. Or record who took part directly: tap **Add attendance**, paste their login IDs (or tap **Everyone who asked** or **All ... club members**), and tap the button. Their periods are credited at once, their teachers are told, and the table shows what was credited for each student.

Case Study Challenge

Wed, Sep 30

credits period 4

Crack a real company's problem in teams of three. The 2:15 class is credited for participants.

Posted by Vikram Singh · 0 approved · 0 credited

Hide join requests (2 pending)

Close

Add the students who took part, by login ID. Their attendance is credited straight away for P4, and their teachers are told.

Student login IDs (one per line, or separated by commas)

Add attendance

Everyone who asked (2)

Roll	Student	Section	Status	Attendance
D2-03	Aditya Kulkarni	D2	pending	Approve Reject
D2-19	Eshan Bose	D2	pending	Approve Reject

Two students waiting for approval, and the add attendance form.

Why a period might not be credited

The student's section has no class then, the class was cancelled, or the event is on a Sunday. The result says which.

7 For administrators

On a brand new deployment, the first person to open the site creates the administrator account. After that, every account is created inside the app.

1. Under **Accounts**, create the HOD account and hand over the login ID and password in person.
2. Create a second administrator, so one lost password is never the end.
3. Use **Reset password** when someone is locked out; it clears the lock immediately.

The screenshot shows the 'Attendance' app interface. On the left is a dark sidebar with a menu: Attendance (Administrator), Overview, Accounts (selected), Records, Analytics, Schedule, Leave desk, Events, Clubs, Notifications, Setup, Activities, Guide, and Profile. At the bottom of the sidebar, it says 'Demo Administrator demo.admin'. The main content area has a top bar with 'Demo Administrator · Administrator' and a 'Sign out' button. Below this is a yellow banner: 'Demo account. This is a sample college for trying the app; anything you change is seen by the next visitor too.' with a link 'Try another role'. The 'Accounts' section title is followed by the text: 'Create the people who run the college. Passwords are handed over in person, not emailed.' Below this is a 'Create an account' form. It has tabs for 'Administrator', 'HOD' (selected), 'Teacher', and 'Mentor'. The description for HOD is 'Runs a department: builds the timetable, enrolls students, decides leave.' The form has three input fields: 'Name' (Dr A. Sharma), 'Login ID' (cse-hod), and 'Password' (at least 8 characters). A 'Create account' button is to the right. Below the form is a note: 'The password is shown as plain text on purpose: you have to be able to read it out or write it down. Ask them to change it from Profile once they are in.' At the bottom is a table titled 'HOD accounts' with columns 'Name', 'Login ID', and 'Added'. It contains one row: 'Dr. Kavitha Rao', 'demo.hod', 'Jul 30, 04:00 AM'. To the right of the table are 'Reset password' and 'Remove' buttons.

Name	Login ID	Added
Dr. Kavitha Rao	demo.hod	Jul 30, 04:00 AM

Creating accounts. Passwords are shown as plain text on purpose, so they can be read out.

Sharing the app with a QR code

Under **Guide**, **Share the app** shows a QR code that opens the introduction page. **Print a poster** prints it large, on its own page, for a notice board or a stall.

Share the app

Print a poster

Scan to open the attendance app

The code opens an introduction page that anyone can read before they have an account: what the app does, how to sign in, and the user manual. Put it on a notice board, a slide or a stall.

Open the introduction page · <http://127.0.0.1:5173/welcome>

Anyone who scans it can read what the app is, download this manual and sign in.

8 Passwords, privacy and the audit trail

If you are a...	Ask this person to reset your password
Student	Your class teacher, or the HOD
Teacher, mentor or HOD	An administrator
Administrator	Another administrator

- There is no reset by email anywhere. Credentials are handed over in person.
- Repeated wrong passwords lock an account for a few minutes. A reset clears the lock.
- You are notified whenever someone else changes your password. If you did not expect it, say so.
- Medical certificates are never public links: only the student, their class teacher and the HOD can open one, and each view is recorded.
- Every correction, override, cancellation, approval, credit and export is written to the audit trail, with who did it and why.

9 Running the tech fest demo

A demonstration deployment has a sample college and one-tap demo accounts, so visitors can try every role without typing a password. The demo college is built around the real D2 BBA routine; its students, marks and events are made up.

Setting it up (once)

1. Use a separate, empty database. Never the college's real one.
2. Create the tables, then the demo college:

```
DATABASE_URL="" npm run migrate
DATABASE_URL="" npm run seed:demo
```

3. Deploy with the environment variable `DEMO_MODE=1`. The sign-in and introduction pages then show the demo buttons.
4. Sign in as the administrator, open **Guide**, and print the QR poster for the stall.

The demo accounts

Button	Login ID	What it shows
HOD	demo.hod	The D2 BBA timetable, one-tap cancellation, records, analytics
Teacher	demo.teacher	SS, class teacher of D2: today's classes, marking, a leave request to decide
Student	demo.student	Above 90% with the badge, and classes credited by an event
Student at risk	demo.atrisk	Below the minimum, and how many classes it takes to recover
Mentor	demo.mentor	The Entrepreneurship Cell, and join requests to approve
Administrator	demo.admin	Accounts, and the QR poster

Every demo account's password is `demo1234`. Visitors cannot change it, reset another demo account's password, or remove a demo account, so nobody locks the next visitor out.

A three-minute walkthrough

1. Scan the QR poster: the introduction page opens.
2. **Teacher**: open today's class, tap **Mark all present**, tap two absentees, save. Two taps plus one per absentee.
3. **Student**: the ring, the gold badge, and the classes the B-Plan contest credited.
4. **Student at risk**: the red ring, and how many classes in a row it takes to recover.
5. **HOD**: the real D2 BBA routine on Schedule. Cancel a day's classes in one tap, then undo it. Records, with flags and stars.
6. **Mentor**: approve the Case Study Challenge requests; each student's credited period appears.

Between sessions

Visitors change things. To put the college back as it was:

```
DATABASE_URL="" npm run seed:demo -- --reset
```

It only wipes a database that `seed:demo` created itself, and refuses any other. The history is dated back from the day it runs, so reset on the morning of the fest.

10 Questions and fixes

What you see	What it means, and what to do
"The timetable has no class in that period for this section"	That period is empty on the timetable. The HOD fills it from Schedule.
"This class was cancelled..."	It was called off in advance. Whoever cancelled it, or the HOD, can restore it from Schedule.
"That period belongs to another teacher"	You can only mark classes the timetable gives you.
"The 48-hour edit window has closed"	Ask the HOD to correct it; the change is recorded with their name.
A class shows as <i>not marked</i>	It was held but you have no mark. If you were there, ask the teacher to correct the register.
An event did not change my percentage	Open the event card: it says which periods were credited and why any were not.
"That teacher already has a class in this period"	The teacher is in another section then. Pick another teacher or period.
"Too many failed attempts"	Wait a few minutes, or ask for a password reset, which clears the lock at once.
My percentage went down although nothing changed	A class you were not marked for was held. Check Not marked under Analytics.

11 Words used in the app

Section	A class group within a course, such as D2. Students, timetables and class teachers belong to a section.
Period	One slot in the day, such as period 1, 10:15–11:15.
Register	The attendance list for one class on one date.
Held class	A class whose register was taken. Attendance is counted against held classes.
Not marked	A held class with no mark for a student. Counts as missed.
Cancelled class	A class called off in advance. Never marked, never counted.
Approved leave	Leave a class teacher or the HOD approved. Left out of the percentage.
Event credit	A period marked present because the student took part in an event.
Minimum	The attendance percentage a course requires; 75% unless the HOD set another.
Badge	The gold 90%+ attendance recognition.
Class teacher	The teacher responsible for a section, who decides its leave requests.
